Use of Non-GAAP Financial Measures

To supplement our financial results presented in accordance with U.S. GAAP, we use Non-GAAP financial measures, namely Non-GAAP net income and non-GAAP net income margin, as supplemental measures to evaluate our operating results and make financial and operational decision. investments. Non-GAAP net income margin is equal to Non-GAAP net income divided by revenues.

By excluding the impact of changes in fair value of long-term investments, which are non-cash charges, we believe that Non-GAAP financial measures help identify underlying trends in our business that could otherwise be distorted by the effect of certain earnings or losses that we include in results based on U.S. GAAP. We believe that Non-GAAP financial measures provide useful information about our operating results, enhances the overall understanding of our past performance and future prospects and allow for greater visibility into key metrics used by our management in its financial and operational decision-making.

Our Non-GAAP financial measures should be considered in addition to results prepared in accordance with U.S. GAAP, but should not be considered a substitute for or superior to U.S. GAAP results. In addition, our calculation of Non-GAAP financial information may be different from the calculation used by other companies, and therefore comparability may be limited.

Reconciliations of our Non-GAAP results to our U.S. GAAP financial measures are set forth in tables at the end of this earnings release, which provide more details on the Non-GAAP financial measures.
